

Cork Holder for Mobile Phone

Orange County, CA
Public Libraries
Open Doors. Free Access. Community.
www.ocpl.org

Materials Needed:

- 21 or 24 corks
- Wood Glue

Step 1: Smear glue on end of cork and press to end of another cork. Repeat so you have three corks end to end.

Step 2: Smear glue on side of a cork and press to side of one of your three corks.

Step 3: Repeat, smearing glue on end of cork also, until you have two rows of three corks.

Step 4: Keep going until you have four rows of corks and press down to flatten.

Step 5: Between the two middle rows, glue corks so that you have a row on top in the middle.

Step 6: Repeat another row behind that one.

Step 7: Your last row goes on top to make a pyramid.

I had to add another row of corks in front to make it more stable for my phone.

Figure 1: A black smartphone with a bright green case is propped up on a stack of wine corks.
